Technical Design:

Folder – Costume Con 37 Website

        Site – Costume Con 37 Programming (already online)

                Schedule – programming.html

                Functions - functions.php

        Folder – Programming Database (Zambia)

                Sql database – panels stored in table (cc37panels)

                        Columns: id

                              Title

                              Description

                              TimeStart

                              TimeEnd

                              Date

                              Room

                              Panelists

        Functions: getDatabase(); - connects to the database
                                getSort(); - sorts the schedule by date
                                getAll(): - sorts all the panels and resets the schedule
                                getSearch(); - searches for a specific term
                                isPostRequest(); - connects the html to php via post
