CAPSTONE PROPOSAL

JAMILA SISCO

January 7, 2019

Costume Con is an annual convention devoted to costumers and the hobby of costuming. This year, the 37th convention will be in Danvers, MA from March 22-25. As the head of programming, I would like to create a website that has the schedule of panels and workshops for the attendees and panelists to see.

I would like to sort the schedule by date (Friday, Saturday, Sunday, or Monday) and conference room location on the site. I would also like to be able to click on a panel to get the description and information such as date, time, location, and panelists. There should also be a search functionality to search by panelist and display the schedule accordingly.

Admins should be able to enter/edit/delete panel information, time, panelists, etc.

I would like for my site to be seen primarily by phone since most people will be checking phones for schedules. I would also like to have a version that is easily printable, for elderly people who need a tactile copy.
